- 3. Known Problems and Workarounds 1

1. New Features in Minitab Engage May 2025

Faster sandbox publishing

As more projects are added to a project repository, the longer it takes to publish a sandbox. With recent performance improvements, the time to publish a sandbox can be significantly faster depending on the change.

Simultaneous uploads of MDP tables

Previously, data managers could upload only one “Managed Data for Projects” (MDP) table at a time. With this release, data managers across the organization can simultaneously upload multiple tables. This saves time and gives data managers the freedom to manage their uploads without having to coordinate with other data managers.

2. Problems Resolved in Minitab Engage May 2025

The following issues are resolved in Minitab Engage May 2025.

- In L10N subscriptions of Engage version 6.5 and higher, you must make a change to the sandbox before templates can be opened in the desktop. (284407)
- Sandboxes without changes have a Pending status. (284409)
- Dashboard reports with many filters may time out in large subscriptions. (187723)

3. Known Problems and Workarounds

Item 1

The desktop app might crash when there are many large images in a Rich Text Box on a form. (182323)

WORKAROUND: Divide the images up among multiple Rich Text Boxes.

Item 2

Using the calendar's date picker when the regional setting's date format does not follow the western calendar results in the wrong year. (182136)

WORKAROUND: Manually type the date instead of using the date picker.

Item 3

Copying items on a form when using Remote Desktop causes the application to crash. (178344)

Item 4

On a form, adding a row below an optional section in a layout table causes the application to crash. (182384)

Item 5

On process maps and value stream maps, when the fill of a shape is a color and the font is set to white, the text is not visible in edit mode. (183145)
